

Diagnostic for practitioners

Infectious respiratory diseases in rabbits

ONLINE

Rabbits with respiratory disease are becoming increasingly common as patients in small animal practice.

This webseminar will give an overview of possible infectious causes and the right diagnostic tools for the corresponding pathogens. We will provide suggestions for the right sampling method and necessary sample materials, along with a few general recommendations concerning therapy.

Tuesday, Dec. 10, 2024
19:00 – 19:45 CET
