

INVITATION for a free WEB-SEMINAR
On Wednesday July 13, 19:00-19:45 (CET)
“Urinary retention”

Dear colleagues,

Nobody is perfect, right? But why not make the best out of these cases that have gone wrong? The dog trickles urine, however both bladder and prostate are unremarkable. If the male dog strains for urine, it surely must be urolithiasis or problems with the prostate gland. But what if there is nothing to be found on radiographs and ultrasound? Join us in reflecting, and learn about the correct approach to stranguria and pollakisuria..

SPEAKER

Dr. Jennifer von Luckner DECVIM-CA, FTA Kleintiere + Innere Medizin Kleintiere is a Small Animal Medicine Specialist certified by the European College of Veterinary Internal Medicine. She graduated in 2002 from the University of Veterinary Medicine, Hannover, Germany.
